Base maintenance

Aero Technic BG offers Base Maintenance services on aircrafts BAe146/ RJ, ATR42/72 Family, A320 Family and B737 Family (Classic, NG and MAX): C-checks, structural repairs, avionic and structural modifications, cabin re-configurations/refurbishment, recovery of aircraft from remote storage locations as well as aircraft maintenance technical record audits. Our highly skilled workforce ensure that your maintenance programme is carried out in as short time as possible and always to the highest standards. Our computerized system for Production Planning and Inventory Management provide excellent control and monitoring features and enables maintaining very good standards of airworthiness.

Line Maintenance

We are setup and manage Line Maintenance station at Sofia Airport for aircraft type BAe146/RJ, ATR42/72, Airbus A320 Family and B737 Family (Classic, NG and MAX). Our processes are organized so that we can set up a new line station very quickly.

Great experience in troubleshooting of our engineers and continuous training are our strengths in case of tricky AOG situations.

At our home base at Sofia Airport we use hangars for technical line support like defect rectification, progressive maintenance or A-checks on Airbus A320 Family, ATR42/72, BAe146/ Avro RJ series and on B737 Family (Classic and NG).

In case of emergency situation we can perform fast troubleshooting and handling of your spare parts.
