YOUR TRUSTED MRO

NON DESTRUCTIVE TESTING

ABOUT US

We are a Bulgarian MRO devoted to providing high quality maintenance, repair, and overhaul services for a diverse range of aircraft. With a team of highly skilled technicians and engineers, we ensure that every aircraft we service meets the highest standards of safety and performance. Our state-of-the-art facilities are equipped with the latest technology, enabling us to handle everything from routine maintenance to complex repairs with precision and efficiency.

OUR NDT TEAM

Over our years of work we have managed to gather a strong team of highly skilled professionals, trained to perform Nondestructive Testing and Non-destructive Evaluation as per the requirements stated in EN 4179. Our level 3 Engineers and the rest of our team brings a wealth of knowledge and practical experience, ensuring that we can tackle even the most challenging situations with precision and confidence.

OUR SERVICES

Eddy Current Testing

- › High-frequency surface and rotary testing
- › Low-frequency sub-surface testing
- › Conductivity measurement
- › ET Phased Array testing

Ultrasonic Testing

- Traditional UT Testing ›
- Phased Array Testing ›
- UT Bond Testing ›
- UT Thickness Measurement ›

Boroscope Evaluation

- › CFM56 -3; -5; and -7 engines
- › V2500 engines
- › PW1100G engines
- › PW 124 and PW 127 engines

Radiography Testing

- All purpose Side-window X-ray tube ›
- Specialized Rotating Anode X-ray tube ›
- Fine grain, medium speed X-ray films ›

Penetrant testing

- › High-sensitivity solvent removable PT Testing with high quality materials

Magnetic Particle Testing

- High-sensitivity MT Testing ›
- with high quality materials

Infrared Tomography Testing

- › All purpose FLIR Infrared tomography camera

OUR MISSION

We pride ourselves on our commitment to quality and safety. By utilizing cuttingedge technology and adhering to the highest industry standards, we are able to provide our clients with reliable and accurate assessments of their aircraft. Our services help to identify potential issues before they become critical problems, saving time, resources, and, most importantly, ensuring the safety and integrity.
